timm-clv.github.io/mon-portfolio/

Skills

Systemic analysis
Critical analysis
Re-evaluation and physical consistency
Proficiency in Embedded Systems (ROS, Python, C)
Proficiency in automation software (MATLAB, LabVIEW)
Knowledge of digital and electronic systems
Problem-solving using neural networks and machine learning
Use of real-time image processing tools
Project management
TOEIC level B2 860/990

Activities

Triathlon
Toulon Robotics Club
Water sports

As a second-year engineering student, I work on projects that combine electronics, embedded programming, debugging, simulation, human-machine interfaces and artificial intelligence. I am dedicated and creative, and I aim to deepen my knowledge and contribute to innovative projects.

Work experience

06/2025 -
07/2025

Systems Engineer/Technician

CEPA/10S, Hyères Naval Base, work placement with the Naval Aviation

- Design of a drone air intake system in accordance with space constraints and minimum air flow requirements.
- Sizing of the motor and ductwork based on fluid mechanics criteria. Structural analysis of the frame. Air flow straightening. Selection of materials. Automated calculation interface for the design process.

2022 -
2025

French Navy reservist (Toulon base)

- Postman, Lifeguard for the GSC.

2021 -
2025

SNSM volunteer

- Lifeguard during the summer months, first-aid responder.

Research Projects

2025 -
2026

Robotic Trajectory Planning

Toulon Robot Club Association

- Optimisation of robot trajectories using a neural network to calculate Bézier curves in Python and C.

03/2025 -
06/2025

Optimisation of maritime surveillance

CS GROUP Company

- Group project on AI-based image processing: boat recognition using a dataset of over 10,000 images.
- Work on the database and the human-machine interface.

2022 -
2024

Underwater acoustics

IM2NP Laboratory

- Study of target kinematics using methods for measuring the similarity of noisy and Doppler-shifted signals.

Education

2024 -
2027

SeaTech Engineering School – La Garde

- Mechatronics and Robotics Systems: electronics, terrestrial and marine robotics, sensor systems, actuators and computer vision, project management, 3D design.
- Minor in Security and Defence: military lectures on technological innovations and geostrategy.
- Additional course in the AI workshop: machine learning, projects on Kaggle and Google Colab focusing on the detection of bank fraud.

2022-2024

Two-year Bachelor's Degree in Mathematics – La Garde
